PowerKids Press, United States, 2004. Hardback. Book Condition: New. 267 x 193 mm. Language: English . Brand New Book. This seven-book series is a user s guide to locating Earth s continents and the countries of the world. Kids will learn that more than 200 million years ago, all continents began as part of Pangaea, a supercontinent that broke up to form seven continents. They will acquire map-reading skills by learning the directions in which longitude and latitude lines point, where the equator is, and what the prime meridian is. The final chapter in each book features a scientist, related to the continent, with specialties that range from dinosaurs to the study of volcanoes. Australia is the smallest continent on Earth. It is also pan of a system of 2,000 islands in the Pacific islands called Oceania. This continent-country is also an island because it is surrounded by water. Australia boasts three great deserts and the largest monolith on Earth, Ayers rock, a place that to the Aboriginal people of Australia is the center of Earth. Off the northeastern coast of Australia is the Great Barrier Reef, a collection of coral reefs. At 1,250 mile long, it is the world s largest coral reef.
